

## News: 2007 Advance Kites & Boards

Wednesday, 13 September 2006

Advance Kites released 2 kites (Kondor/Kaiman) and 2 boards (Sigma/Omega) for 2007. Official Advance-Kites website [here](#).

### KONDOR (hybrid bow)

The Kondor is a "true" Hybrid-Bow. The kite can be used as a Bow with bridles or pulleys or be used as a 5-liner (Bow, C). This change-over can be done in a few simple steps, since both setups are provided/included. Hence any rider can setup the kite to his/her own preferences. The finishing of the kite is of the highest level.

Sizes: 7, 9, 11, 13, 15 m<sup>2</sup> (13m<sup>2</sup> available from end of September)

Color range:

Price: not available yet

### KAIMAN (C-kite)

The "Kaiman" is a further development of the Cobra06. It's a high performance 5-line C-Kite, for riders who are looking for a very fast, powerful Kite with big hangtime, very minimal steering pressure and superfast turns.

Sizes: 8, 10, 12, 14, 18 m<sup>2</sup>

Color range:

Price: not available yet

### SIGMA (directional wave)

The Sigma is a Wave Directional, which can also be equipped with fins at the front and then be used as a "Mutant" for riding backwards.

Material: Wood-Composite // Custom Made in Italy

Sizes: 150x45 / 160x46

Price: not yet available

OMEGA (twin tip)

The "Omega" is a full wood Custom Bidi with Clearlook Optics. Very light but still very stable.

Sizes: 130x37 / 137x37

Price: 750 EUR // Custom Made in Italy
